

CoffeeChain Testing Manual

OPEN THE APP

Go to <https://coffeechain-rust.vercel.app>

Password for all test accounts: **demo123**

Username	Role	Organization
supplier1	Supplier	Mbeya Fertilizers Ltd
warehouse_mgr1	Warehouse Manager	Mbeya Fertilizers warehouse
retailer1	Retailer	Bukoba Agro Shop
cooperative1	AMCOS	Bukoba Coffee Farmers AMCOS
admin	Admin	System oversight
regulator1	Regulator	Compliance view

Also available: supplier2, retailer2, cooperative2, cooperative3 (same password).

Use a separate browser tab for each role. Click **Refresh** after switching users.

TWO PROCESSES TO TEST

Both end at the **farmer**: distribute fertilizer, confirm **OTP on phone**, then check the **receipt** in Verification.

Process 1 Supplier sends stock directly (no order).

Process 2 Shop orders first, then supplier fulfils.

Process 1: Direct dispatch to farmer

1. Supplier sends fertilizer

Login: **supplier1**

1. Open **Dispatch**
2. Select batch, destination (retailer or AMCOS), bags
3. Submit

2. Shop receives stock

Login: **retailer1** or **cooperative1**

1. Open **Receive Fertilizer**
2. Confirm the incoming transfer

3. Give to farmer

Login: **cooperative1** (AMCOS) or **retailer1**

AMCOS: Farmer Registry → Distribute Fertilizer → select batch, farmer, bags

Retailer: Distribute → select buyer and bags

Enter the **OTP sent to the phone**. Complete the transfer.

4. Check receipt

Open **Verification**. Open the transfer record and review the receipt and trust seal.

Process 2: Order fertilizer to farmer

1. Shop places order

Login: **retailer1** or **cooperative1**

1. Open **Supplier Catalog**
2. Click **Order** on a supplier
3. Select types and bags, delivery address, date
4. **Place Order**

2. Supplier dispatches from warehouse

Login: **supplier1**

1. **Incoming Orders** → eye icon
2. Select a batch with enough stock
3. **Dispatch from [batch]**

3. Warehouse manager verifies

Login: **warehouse_mgr1**

1. **Orders Queue** → **Verify** tab
2. **Verify Dispatch**

4. Shop confirms delivery

Login: same shop user from step 1

1. **My Orders** → eye icon
2. Status **En route** → **Confirm Delivery**

5. Give to farmer

Same as Process 1 step 3: **Distribute Fertilizer**, enter **OTP on phone**.

6. Check receipt

Same as Process 1 step 4: **Verification** tab → view receipt.

OTHER KEY DETAILS

Messages you will see

When	Where
New order placed	Supplier and warehouse manager get a bell notification
Order dispatched	Warehouse manager notified to verify
Order verified	Shop notified that delivery is en route
OTP for farmer	SMS sent to farmer phone (demo may show code on screen)
Registration submitted	Admin gets bell notification
Registration approved/rejected	Applicant gets SMS if phone was provided
Database tampering detected	Admin gets bell notification and SMS alert

Self registration

Anyone can apply from the **Sign Up** page on the live app.

1. Open the app → **Sign Up**
2. Choose role (Supplier, Retailer, or Cooperative)
3. Fill organization details and submit
4. Account stays **pending** until admin approves

To test approval: Login as **admin** → **Registrations** → review request → Approve or Reject.

Approved users can log in immediately. Rejected users receive a message explaining why.

Database tampering

CoffeeChain stores a secure receipt for verified transfers. If someone changes the database directly, the system detects it.

How to test as admin or regulator:

1. Login as **admin** or **regulator1**
2. Open **Chain Integrity**
3. View transfers and their integrity status
4. Click **Scan** to compare database records against stored receipts
5. A **mismatch** means data was altered outside the app
6. Admins receive an alert and SMS when tampering is found
7. When data is restored to match the receipt, the system marks it as restored

Integrity statuses: **ok**, **mismatch**, **missing receipt**, **missing anchor**, **unchecked**.

Quick reference by role

Supplier: Dispatch · Incoming Orders · Warehouse

Warehouse Manager: Orders Queue · Inventory · Pending

Retailer / AMCOS: Supplier Catalog · My Orders · Receive Fertilizer · Distribute · Verification

Admin / Regulator: Users · Registrations · Chain Integrity · Reports

Order statuses

Status	Meaning
Pending	Order sent, waiting for supplier
Dispatched	Supplier sent it, waiting for warehouse verify
En route	Verified, shop can confirm delivery
Delivered	Shop received it

Tips

- No stock on dispatch? Supplier needs more bags in the warehouse first.
- Custom orders: write the fertilizer type and specs in the order form.
- Bell icon shows all in-app alerts.
- After farmer distribution, always check **Verification** for the receipt.
